SEEKING VOLUNTEER

First we are Human and then we are Manipuri. We each of us have responsibilities and together we can do great things. At today's pace of fast Industrialization, we need to stop this blind greedy attitude of Human being. It is not what a big Industry or high rise building that will give us future and success. The reality is one day or the other; industry will come and end with demands. But the basic necessity of life will never end and we need to preserve them for us and our future? Once we destroy the natural resources, these big factories, or the hi-tech gadgets and high rise buildings will not give us life. Today, to make everyone realize the need to preserve the natural process is our collective responsibility. So to save ourselves, come and join the campaign "BLUE AND GREEN" for ORGANIC MANIPUR.
